Fullstack Developer
Frontend | Generative AI | Data Science

Fullstack Developer with experience in building front and back end applications, LLM tuning and RAG systems. EU citizen eligible and willing to relocate.

TECHNICAL SKILLS

- **Frontend development:** javascript, html, css, react, nodejs,threejs, tailwindcss, typescript
- **Data science:** python, pandas, numpy, matplotlib, mysql
- **Generative AI:** Ollama, RAG, Fine tuning, ComfyUI
- **Software & Collaboration Tools:** git, github, github actions, docker
- **3D:** Three.js, Blender
- **Additional Skills:** QGIS, GLSL
- **Languages:** Portuguese (fluent), English(fluent), German(basic)
- **Certifications:** AWS cloud formation

PROFESSIONAL EXPERIENCE

Wipro - **Frontend Developer** **January 2023 - October 2025**

- Improved performance and maintainability of existing React components by refactoring, optimizing and documenting TypeScript code.
- Developed accessible UI components for a platform serving 2M+ users, earning national recognition for accessibility implementation.
- Reduced documentation related support tickets by documenting and maintaining 50+ React components in Storybook.
- Worked with Scrum and Kanban methodologies and communicated technical work with non-technical stakeholders.
- **Stack**: TypeScript, React.js, TailwindCSS, Node.js, Storybook, Git

CNA idiomas - **Programming teacher** **October 2025 - May 2026**

- Taught programming fundamentals through games and scripts, developing students' logical and critical thinking skills.
- **Stack**: Python, Scratch

PROJECTS

- **Bookstore RAG LLM**
  Local LLM assistant built with Ollama that retrieves relevant context to ground responses in bookstore data.
  Stack: Python, Ollama
- **UK Crime Map**
  Interactive crime map of England and Wales using public data from the UK Police and Office for National Statistics.
  Stack: JavaScript, Node.js, HTML, CSS
- **Parking Lot Classifier**
  Computer vision classifier that detects whether parking spaces are occupied using a Kaggle dataset.
  Stack: Python, NumPy, Pandas
- **Mars Orrery**
  Browser-based 3D orrery of Mars and its moons built with Three.js using NASA public data.
  Stack: JavaScript, Three.js, GLSL, Blender

EDUCATION

Computer Science, Uninassau - Recife 01/2023- 12/2025
Cybersecurity specialization, CESAR School - Recife 01/2026 - 06/2027
